

ACKSYS Communications & Systems
REACH Regulation

May 2023

Registration, Evaluation, Authorization and Restriction of Chemicals Regulation (EC) No 1907/2006

REACH is a European Community Regulation on chemicals and their safe use which stands for Registration, Evaluation, and Authorization of Chemical substances.

The aim of REACH is to improve the protection of human health and the environment through the better and earlier identification of the intrinsic properties of chemical substances.

Substances manufactured or imported in quantities of 1 ton or more per year must be registered by the relevant deadlines, or may not be placed on the market.

ACKSYS Communications & Systems (ACKSYS) Declaration Regarding the REACH Duty to Communicate Information on Substances of Very High Concern (SVHCs)

ACKSYS, as a downstream user, neither manufactures nor imports any chemical substances into the European Community on their own or in preparations in quantities of 1 ton or more per year.

The delivered product, based on our best knowledge at the date of publication of this document, do not contain chemical substances included on the initial candidate list in a concentration above 0.1% weight by weight (w/w) and above 1 ton in total per year per substance. Therefore, ACKSYS did and does not currently have a direct REACH obligation to pre-register and potentially register substances.

This declaration will be updated as soon as any changes occur or new relevant substances are added to the candidate list (last update January 17th, 2023 (ECHA/NR/21/20), 233 substances).
