ACKSYS will be at InnoTrans 2024: come and discover our railway communication solutions ! 🚂

We are excited to announce our participation in InnoTrans 2024, the world's largest event dedicated to transportation technology.

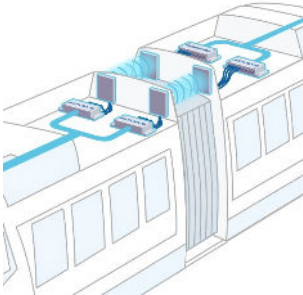

Join us from September 24th to 27th in Hall 4.1, booth #480, to explore our latest innovations in railway communication solutions.

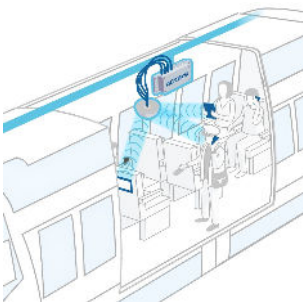

What you'll discover at our booth 🔍

Train-to-ground communications: redundant, high-speed wireless solutions ensuring reliable communication between train and ground.

Wireless car-to-car coupling: Reliable and continuous connection, regardless of train composition, ensuring a secure and redundant onboard network.

Onboard WiFi coverage: Solutions to enhance the passenger experience with Wi-Fi, onboard announcements, PIS, CCTV, VoIP, and infotainment.

Why choose ACKSYS ?

With over 20 years of experience in wireless communications dedicated to the railway market and with more than 28 000 RailBox routers installed on board and trackside, ACKSYS is the trusted partner for robust, scalable communication solutions tailored to the demanding environments of subways, trams, and trains.

Come meet us !

 Dates: [September 24th to 27th, 2024](#)
